

4-H AEROSPACE AND ROCKETRY PROJECT

In this project, youth members will learn about aerospace foundations such as lift, drag, and other interactions from when an object interacts with air by exploring and building rockets. Aerospace and rocketry is a project that can turn anyone on to being a rocket scientist! Knowledge is gained through the construction and flight of model rockets powered by air, water, or solid fuel engines. Participants will be able to learn thorough experimentation.

- What properties of rocket design work and why some configurations work better.

Starting Out <i>Beginner</i>	Learning More <i>Intermediate</i>	Exploring Depth <i>Advanced</i>
<ul style="list-style-type: none"> • Learn how to construct and fly rockets that are powered by air or water • Learn how to safely handle necessary tools for construction and flight. • Learn how to build a solid engine rocket from a simple kit. 	<ul style="list-style-type: none"> • Learn how to build advanced rocket kits. • Learn the proper technique to pack a parachute and flame retardant cloth to prevent damage to the rocket. • Learn how lift and drag affect the flight of the rocket and how to increase the efficiency • Learn the process of 	<ul style="list-style-type: none"> • Learn how to build a rocket without a kit from component materials. • Learn how to calculate the obtained altitude of the rocket. • Be able to teach others about aerospace and prepare presentations to assist. • Expose others in the community to aerospace and

The activities above are ideas to inspire further project development. This is not a complete list.

4-H THRIVE

Help Youth:

Light Their Spark

A spark is something youth are passionate about; it really fires them up and gives them joy and energy. Help youth find how this project excites them.

Flex Their Brain

The brain grows stronger when we try new things and master new skills. Encourage youth effort and persistence to

Reach Their Goals

Help youth use the GPS system to achieve their goals.

Goal Selection: Choose one meaningful, realistic and demanding goal.

Pursue Strategies: Create a step-by-step plan to make daily choices that support your goal.

Shift Gears: Change strategies if you're having difficulties reaching your goal.

Reflect

Ask project members how they can use their passion for this project to be more confident, competent and caring. Discuss ways they can use their skills to make a contribution in the

Expand Your Experiences!

Science, Technology, Engineering, and Mathematics

- Investigate the concept of aerodynamics and the science behind the flight of the rocket.
- Experiment with differing constructions of rockets to see how flight is affected.

Healthy Living

- Explore the outside landscape surrounding the launch pad for potential safety hazards.
- Make new friends while building and launching rockets with others.

Citizenship

- Demonstrate the use of model rockets to other youth using skills learned in the project.
- Trace the history and contributions of nations to rocket development.

Leadership

- Teach less experienced members about aerospace and rocketry.
- Become a junior or teen leader.
- Start other Science, Engineering, and Technology projects within the county us-
