4-H Youth Development Program

Universal

## Introduction

4-H learning experiences are based on the principles and practices of Positive Youth Development. The structured learning, encouragement, and adult mentoring that young people receive through their participation in 4-H plays a vital role in helping them achieve future life success. Positive Youth Development views young people as vital resources with assets and potentials to be developed rather than as problems to be managed. 4-H staff and volunteers intentionally address youths' basic needs by intentionally integrating elements within 4-H experiences that create environments conducive to optimizing youth development.

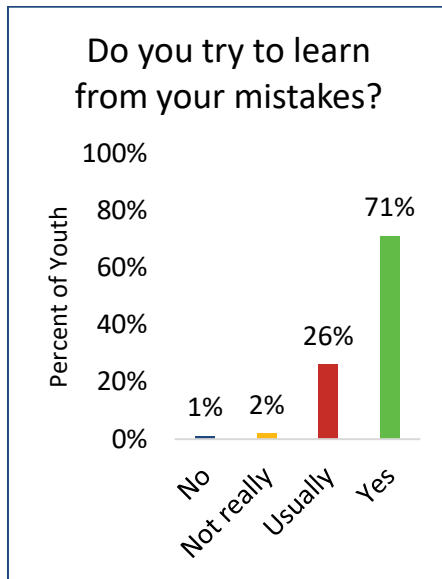

This report summarizes the impact of our 4-H Positive Youth Development programs on our youth.

## Participants' 4-H Experience

1,058 youth completed the Universal survey during the 2017-18 program year. Youth were between the ages of 8 and 18, with the average age being 12.36 years (standard deviation= 2.45 years). The average number of years in 4-H was 3.79 (standard deviation=2.64). The sample was 63% female and 37% male. The racial breakdown of the sample was: 78% White, 2% African American, 3% Asian, 2% Native American, 0.3% Pacific Islander, 8% Multiple, and 5% Undetermined. 26% of youth were Hispanic. Youth lived in farm (19%), rural (9%), town (26%), suburb (21%), and city (15%) areas.

Youth were asked a number of questions about what they may have learned during this program. Results are shown in the figures that follow. These results are based on youth who had permission to use their data. (Percentages may add up to 99% or 101% due to rounding.)

## Personal Mindset

Before making a decision, do you stop to think about your choices?

Do you think about how your choices affect others?

Do you set goals for yourself?

Do you keep trying until you reach your goals?

Do you treat others the way you want to be treated?

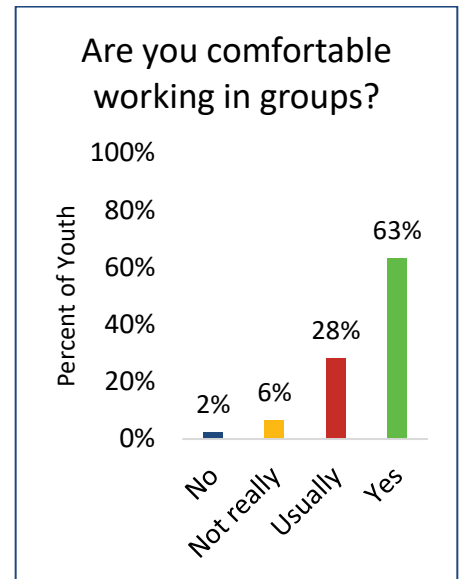

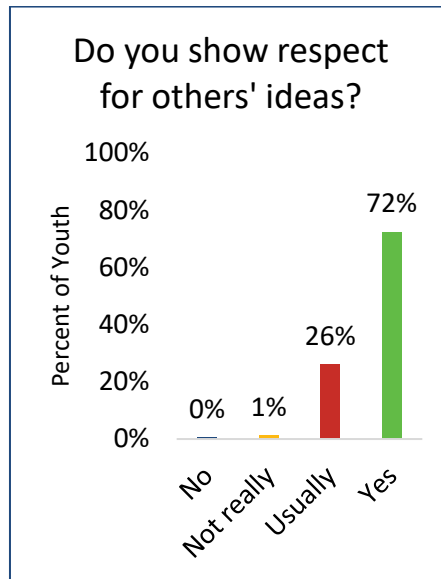

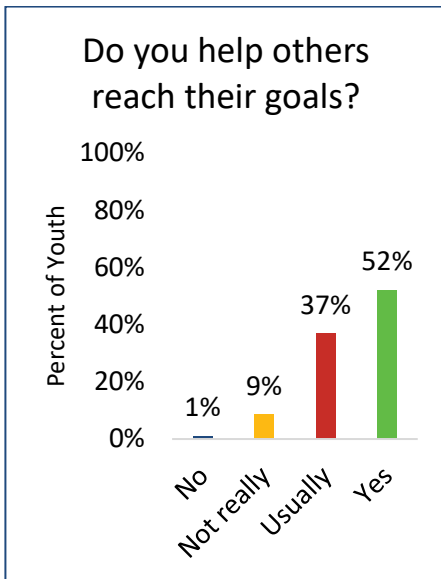

Do you follow the rules even if no one is watching?

Are you willing to try something you might get wrong?

## Social Skills

## Other Skills

## Conclusion

Youth-driven 4-H experiences provide young people access to safe learning environments; challenging experiences that build skills, competencies, and resiliency to address life's challenges and to actively contribute to society; and partnerships with caring adults to help meet youths' basic needs of belonging, mastery, independence, and generosity. Youth who participate in 4-H report better grades, higher levels of academic competence, and an elevated level of engagement at school. They are also nearly two times more likely to plan to go to college. The structured learning, encouragement and adult mentoring that young people receive through their participation in 4-H plays a vital role in helping them achieve future life successes.
