

V. PUBLICATION EXAMPLES

Lee, C., **Valachovic, Y.**, Garbelotto, M. 2010. Protecting trees from sudden oak death before infection. Agriculture and Natural Resources, University of California. Berkeley, CA. Publication # 8426.

In this publication we summarize the results of 5 years of our collaborative research and present the findings in a form that we hope is accessible to landowners, arborists, foresters and those with an interest in or management role for residential oak tree care. I chose this publication because it demonstrates my collaborative work with UC colleagues and my ability to communicate to a range of audiences.

Valachovic, Y., Lee, C., Glebocki, R., Scanlon, H., Varner, M. and D. Rizzo. 2010. Understanding the Long-Term Fire Hazards in Forests Affected by Sudden Oak Death. In Frankel, Susan J.; Kliejunas, John T.; Palmieri, Katharine M. 2010. Proceedings of the Sudden Oak Death Fourth Science Symposium. Gen. Tech. Rep. PSW-GTR-229. Albany, CA: U.S. Department of Agriculture, Forest Service, Pacific Southwest Research Station. 378 p.

In this publication we share results of a research project that I initiated in response to widespread concern over woody fuels that are beginning to be accumulated following waves of tanoak mortality from sudden oak death in the coastal forests of California. While this publication reports only preliminary findings, it demonstrates my research, analysis and writing abilities. The research is now complete and a comprehensive paper has just been accepted for publication to the Journal of Forest Ecology and Management.

Valachovic, Y. 2010. Resources for Humboldt County Forest Landowners. UCCE Humboldt County Publication. Eureka, CA.

*This publication follows the **Forest Stewardship Series**, our 24-part ANR 8000 publication series published in 2007, that provides owners of California forestlands with a comprehensive source of management and guidance information. To make the information more accessible to a local audience, I developed this guide independently from the original production team. I chose this publication because I enjoyed the development and layout process and am pleased that it is being widely used in Humboldt County.*
