

**UC Career Bibliography  
Term Review Oct 1, 2009 to Sept 30, 2010**

*Organization*

Publications are listed in chronological order (most recent publications are first), broadly categorized in accordance with the E-Book and occasionally subcategorized by type. [Publications for this period under review \(October 1, 2009 to September 30, 2010\) are printed in blue font and boxed.](#)

*Summary*

My career began in the Department of Entomology at the University of California Riverside in the Ornamentals Project under the direction of Dr. Michael Parrella (UC Davis). This bibliography reflects a continuation of my career as a UC employee in research and education of the ornamental industry in California, the nation and internationally. My bibliography exceeds the productivity and expectations for advisors at my present step, Associate Advisor Step II. I have published a total of **33** publications this term. I co-authored **2** scientific articles in scholarly journals. I am first author on the majority of the publications for this term. The bibliography, however, demonstrates that I collaborate on a number of levels with colleagues both in California and across the nation. I believe that my publication record demonstrates my professional reputation in research and extension. In addition, I believe it shows an extensive and diverse record among scientific peer-review, technical, extension, industry, UC ANR, and popular press publications. My overall bibliography clearly indicates that I have the ability to publish in an array of scientific journals, both national and international, and the ability to publish popular articles and newsletters that directly impact my clientele.

A summary table of my publication achievements is below:

<b>Summary of Career Publications for James A. Bethke</b>			
<b>E-Book Categories</b>	<b>2009-2010</b>	<b>1980-2009</b>	<b>1980 to Present</b>
