September in the Garden:

What to plant:

- Cool-Weather annuals like pansies, violas, snapdragons can be transplanted now.
- Also, transplants of broccoli, cabbage, cauliflower, and kale can be planted this month.
- Direct seed peas, spinach, radishes, lettuce, and carrots.

September Chores:

- September is a good time to consider reducing the size of your lawn. It is also a good time to rejuvenate a lawn with over-seeding.
- Put your spent annual and vegetables (disease-free, of course) in your compost pile.
- Add compost to the beds that had the annuals and vegetables you are pulling out, before re-planting in those beds.

This is also the month to dis, divide, and re-plant overgrown perennials that have finished blooming. Be sure to clear out any weeds that developed in the perennial bed.
