# **How To Obtain Milestone and/or Transline**

Milestone and Transline are agricultural use herbicides; this means that these chemicals are not labeled for over the counter sales. As such, a permit (Operator Identification Number) must be obtained before you can purchase and use either product. Permits are free.

## **To obtain a permit to buy and use Milestone/Transline:**

- 1) Call the Agriculture Department at (530)621-5520 and ask for a permit to spray Milestone/Transline.
- 2) An Agricultural Biologist will ask you for information including: your name, contact information, parcel number(s) (if readily available), if you have a well, or employees, and whether you have any crops.
- 3) If you intend to volunteer spraying a neighbor or family member's property, be sure to tell us so that we can give you the necessary 'Permission to Treat' form to fill out. This legally allows us to include their property on your permit, while legally allowing you to spray their property.
- 4) Once the Agricultural Biologist has all the applicable information and documentation needed, he/she will set up an appointment time with you to pick up your permit.
- 5) Please allow a 30 minute block when picking up your permit as there will be a considerable amount of information and paperwork to go through, including how to fill out a monthly pesticide use report.
- 6) Once you have your permit, it will be valid through the 31st of December for the calendar year. If you have any chemical left over after this time you must renew your permit as your permit lets you not only buy, but apply and store an agriculturally labeled product.
- 7) An extra copy of your permit will be given to present to your company of choice to buy Milestone, Transline, or any other agriculturally labeled product. Check with your local dealer for availability.
