

# **Tehama County** Department of Agriculture/Weights & Measures

To: A.G. Kawamura California Department of Food and Agriculture

and

The Honorable Board of Supervisors **Tehama County** 

I am pleased to submit the 2008 Agricultural Crop Report. As required by Section 2279 of the California Food and Agricultural Code, this annual report provides a statistical description of Tehama County's agricultural production. All figures in the report represent gross returns only and do not reflect net income of producers.

The total gross value of Tehama County agricultural production in 2008 was \$159,119,200, a 16.6% decrease from 2007 record values. The decline is attributed to significant decreases in prices for several commodities.

Orchard crops lead the overall decrease in value of \$34,640,000 from 2007. Although walnut yields increased, a 52.0% price decrease resulted in a value decrease of \$18,641,900. A freeze in April and unseasonable heat and winds in May attributed to the 47.4% decrease in olive values. Wine grapes decreased 61.8% due to yield decreases resulting from the April freeze. Almond values dropped 24.4% due to price decreases. Prunes posted a modest increase of 2.4%

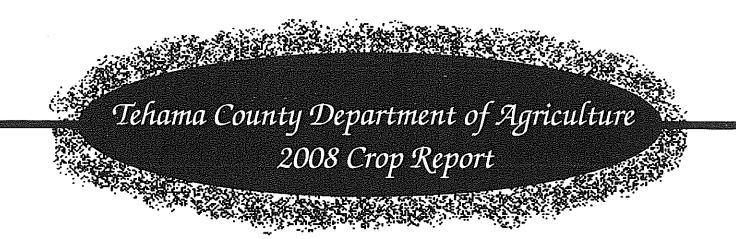

Field crops increased 49.4% in value, with alfalfa hay contributing a 76.2% gain. Apiary products increased 74% in value. Livestock declined 20.0% due to decreases in inventory and prices. Rangeland values continue to decrease as a result of ongoing droughts and dropped another 25.4%.

My sincere thanks goes out to the growers, processors, government agencies, and others that provided information used in compiling this report, their cooperation is invaluable. I wish to thank all staff that assisted in compiling this report with special recognition to Marcie Skelton for the report's production, as this publication would not be possible without their combined efforts.

Respectfully Submitted.

Rick J. Gurrola

Agricultural Commissioner

# Annual Sustainable Agriculture Report

In accordance with Section 2272 of the California Food and Agriculture Code, this Crop Report includes a brief account of those efforts, which are being made to exclude or eradicate exotic pests; and to best manage those which already exist, in a manner most conducive to the protection of our environment. Three 'A' rated noxious weeds, of limited distribution were under eradication. The 'A' rated plants include Skeleton Weed, Dalmatian Toad-flax, and Spotted Knapweed. Tehama County continues to manage sites of 'B' and 'C' rated weeds in areas of limited distribution.

During 2008, 109 high-risk shipments were inspected for compliance with quarantine requirements, 2 of the shipments were rejected. During the year, 1,391 various shipments were certified for export to 49 countries around the world.

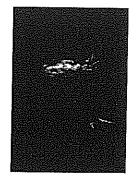

Pest detection trapping for Mediterranean Fruit Fly, Oriental Fruit Fly, Melon Fly, Japanese Beetle, and Gypsy Moth consisted of 358 traps being deployed, resulting in no finds. One hundred sixty two Glassy Winged Sharpshooter (GWSS) traps were placed in Tehama County, 206 nursery shipments were conducted, as well as county wide surveying, resulting in no finds. The GWSS carries Pierce's Disease that is deadly to grape vines. The GWSS is known to feed on more that 100 plant species found in urban and rural landscapes and spreads other diseases such as Leaf Scorch to almonds and Alfalfa Dwarf in alfalfa. In addition, the GWSS can weaken plants making them susceptible to diseases not carried by the GWSS itself.

There were 23 registered organic growers in Tehama County in 2008, consisting of both local Farmer's Market producers and large-scale livestock, dairy, orchard and field crop producers.

Tehama County continues to actively monitor for the Light Brown Apple Moth (LBAM). In 2008 there were 85 traps deployed throughout the county with emphasis on nurseries and fields destined for the global market. The LBAM is an invasive pest that attacks over 250 crops and 2,000 host and ornamental plants. Infestations and subsequent quarantine restrictions are in ten Bay Area and Central Coast counties. Protecting California's environment from invasive species is the goal and eradication is currently the strategy. LBAM has not been found in Tehama County.

Further information can be found at: http://www.cdfa.ca.gov/phpps/pdep/lbam/lbam\_main.html

Pictures below are of the Light Brown Apple Moth.
