Computer Name: Windows 10
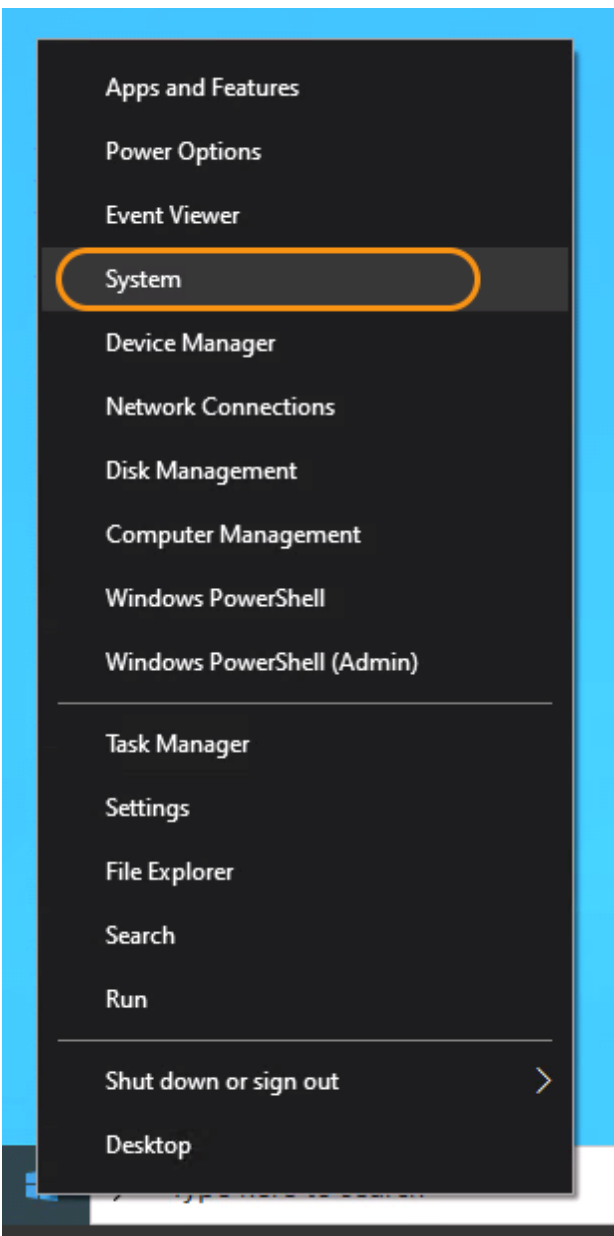

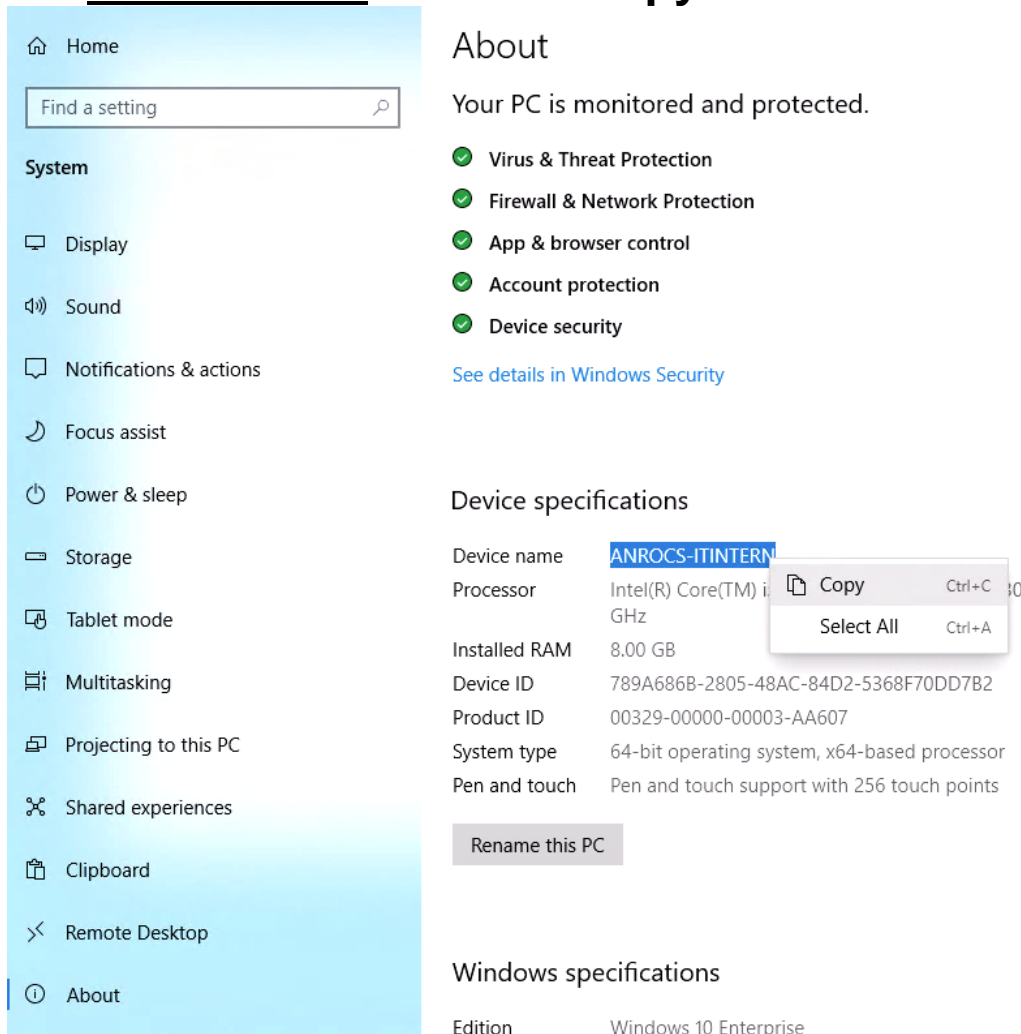

This guide outlines the steps to find your Windows 10 computer name. This is especially useful for remote-desktop connectivity purposes.

1) To determine the first part of the computer name, right-click the Start menu icon (usually on the bottom-left of your screen), then select **System**

2) Highlight then right-click the text to the right of the <u>Device name</u> and click **Copy**

Pen and touch	Pen and touch support with 256 touch points

Copy   Ctrl+C
Select All   Ctrl+A

Rename this PC

Windows specifications

Edition   Windows 10 Enterprise

3) Paste the name you'd copied in a text file then paste the following domain at the end: **.ou.ad3.ucdavis.edu**

- As an example, the full computer name for the one shown in the screenshot above would be **ANROCS-ITINTERN.ou.ad3.ucdavis.edu**
- Please note there are no spaces in the full computer name.
