The California Naturalist Handbook

GREG DE NEVERS, DEBORAH STANGER EDELMAN, AND ADINA MERENLENDER

"Everyone interested in creating a sustainable society should have a copy of *The California Naturalist Handbook*."

—Paul R. Ehrlich, co-author of *The Dominant Animal*

"Whether you are a student preparing yourself for a professional career in natural science or a self-taught nature enthusiast, this book will help you look deeper, see more, understand what you find, and ask more profound questions as you explore California."

—John Muir Laws, author of *The Laws Guide to the Sierra Nevada*

"This book reminds students of what makes California a brilliant place to explore and experience nature."

—Ann Wasser, Pacific Grove Natural History Museum

"*The California Naturalist Handbook* is the new, go-to reference for any question about the nature of the state, its energy resources, land management and environmental concerns."

—Rich Stallcup, author of *California Traveler Birds of California*

"This is a dangerous book. If you start reading it, you may find yourself having the uncontrollable desire to study the insects in your backyard, examine the rocks in a local roadcut, or look for frogs along a mountain stream."

—Peter Moyle, author of *Fishes: An Enthusiast's Guide*

The California Naturalist Handbook provides a fun, science-based introduction to California's natural history with an emphasis on observation, discovery, communication, stewardship and conservation. It is a hands-on guide to learning about the natural environment of California. Subjects covered include California natural history and geology, native plants and animals, California's freshwater resources and ecosystems, forest and rangeland resources, conservation biology, and the effects of global warming on California's natural communities. The *Handbook* also discusses how to create and use a field notebook, natural resource interpretation, citizen science, and collaborative conservation and serves as the primary text for the California Naturalist Program.

Greg de Nevers is a botanist and naturalist with years of experience observing nature and sharing it with others through writing and teaching.

Deborah Stanger Edelman co-founded the California Naturalist Program and has over 20 years experience developing resource conservation and education programs for organizations.

Adina Merenlender is a Cooperative Extension Specialist at University of California, Berkeley and is an internationally recognized conservation biologist.

280 pp., 6 x 9; 40 color illustrations, 20 b/w photos, 3 line illustrations, 5 maps
