

Codling Moth IPM Webinar

Monday, May 6, 2024

3:00-5:00pm

Join us to learn about Integrated Pest Management (IPM) strategies for codling moth, a serious economically-damaging pest in apple, pear, and walnut orchards. This webinar will combine science-based recommendations from UCCE experts with real-world examples and anecdotes from local apple growers, PCAs, and consultants.

Presentations & Discussions with:

Jhaldendra Rijal, UCCE IPM Advisor
Ellie Andrews, UCCE Specialty Crops Advisor
Local apple growers, PCAs, and consultants
