

## Community Outreach & Fundraiser

This year's theme, "Meet me in the Garden," explores ways to grow your love of gardening in your yard and around the community. Within are articles such as: gardening with fire resistance in mind, how to protect your plants during days of intense summer heat, buying and growing local foods, and fostering a native habitat through your plant selections. Plus, information on how you can interact directly with UC Master Gardeners.

This gardening guide and calendar is appropriate for gardeners of all levels and styles. The practices encouraged within the calendar are those recommended by the University of California Master Gardener Program.

**We are a non-profit organization  
and appreciate your support.**

This calendar is suitable for climate zones from California's Central Valley to the foothills. For other climate zones, modify the tips as needed to adapt to your area's growing conditions.
