

# ~~THIRD~~ FOURTH ~~THURS~~ FRIDAY THINGS FROM THE FIELD

## WHAT IS IT?

A recurring event to meet the Sac Valley orchard farm advisors in a casual setting and get timely updates on things we've been seeing in the field. Bring questions, pictures, and comments!

### NEW DISEASE INFO: RED LEAF BLOTCH IN ALMONDS

UC Extension Specialist Dr. Flo Trouillas will join us to present on red leaf blotch in almonds. This disease was first found in California in 2024 and has been detected as far north as Butte County. Dr. Trouillas will cover the biology of the pathogen, symptom development through the season, and best management practices for the disease.

ROUND TABLE: After the presentation, we'll open the floor to discuss issues and concerns from the field for all tree crops. Bring your questions, observations, photos and more for an open forum of growers, PCAs, industry members and farm advisors.
