

THIRD THURSDAY THINGS from the FIELD

A recurring event to meet the Sac Valley orchard farm advisors in a casual setting and get timely updates on things we've been seeing in the field.

This Month: Nematode Management in Orchards

UC nematologist Dr. Andreas Westphal will join us to present his research on managing nematodes in orchards. His talk will cover nematode biology and feeding strategies, chemical control for nematodes in new and established orchards, and the use of organic material and cover crops to control nematodes in preplant situations. He will also discuss cultural controls, including rootstocks with genetic resistance or tolerance to nematodes.

After the presentation, we'll open the floor to discuss issues and concerns from the field for all tree crops. Bring your questions, observations, photos and more for an open forum of growers, PCAs, industry members and farm advisors.

April 16, 2026

11AM-1PM

UCCE Glenn County Office
821 E South St. Orland, CA 95963

Save the Date for our upcoming meetings:

UCCE Sutter-Yuba Office

May 21 • July 16 • Nov 19

UCCE Glenn Office

June 18 • Aug 20 • Dec 17

University of California Agriculture & Natural Resources (UC ANR) is an equal opportunity provider.
