

# THIRD THURSDAY THINGS from the FIELD

A recurring event to meet the Sac Valley orchard farm advisors in a casual setting and get timely updates on things we've been seeing in the field.

## **This Month: Mold Management in Walnuts**

UC plant pathologist Themis Michailides will join us to discuss his research on mold management in walnut orchards. This will include basic information about the biology of the disease, as well as information on effective chemistries and spray timing.

After the presentation, we'll open the floor to discuss issues and concerns from the field for all tree crops. Bring your questions, observations, photos and more for an open forum of growers, PCAs, industry members and farm advisors.

**July 16, 2026**

**11AM-1PM**

**142 Garden Hwy A  
Yuba City, CA 95991**

Save the Date for our upcoming meetings:

**UCCE Sutter-Yuba Office**

Nov 19

**UCCE Glenn Office**

Aug 20 • Dec 17

University of California Agriculture & Natural Resources (UC ANR) is an equal opportunity provider.

## **TTF: Mold Management in Walnuts**

1 HOUR DPR CREDIT REQUESTED
