CONE CROP SURVEY FORM

Date: _____ Rating By: _____

Seed Zone: _____ Elevation: _____

T: _____ R: _____ Sec: _____ Lat: _____ Long: _____

Stand Observed From: within stand _____ road _____

Motor Log:

Comments on Stand Condition: (form, density, access, safety for collection)

RATING
 (Check number that applies)

Species	PP	JP	SP	DF	CRW	WF	RF	IC	Other
1. None									
2. Very Light									
3. Light									
4. Medium									
5. Heavy									

The cone crop rating is based on ocular estimates of cone quantities on dominant and co-dominant trees, 12 inches d.b.h. or greater. Five classes are used as follows:

Rating	Criteria
1. None	No cones on any seed trees.
2. Very Light	Few cones on less than 1/4 of the seed trees.
3. Light	Few cones on more than 1/4 of the seed trees.
4. Medium	Many cones on 1/4 to 1/2 of the seed trees.
5. Heavy	Many cones on more than 1/2 of the seed trees.
