

Australian
PISTACHIO GROWERS' ASSOCIATION INC

Pistachio Researcher

- SUNRAYSIA HEARTLAND
- UNIQUE HORTICULTURAL ROLE
- REMUNERATION (including a car) TO BE NEGOTIATED

The Australian Pistachio industry is an exciting, profitable business experiencing a strong growth stage. In 2021 there are over 50 pistachio growers with a total area planted of about 2,000 hectares.

To maintain a highly profitable industry that is sustainable and rewarding for existing growers and attractive to new growers the industry is committed to employing a person to drive the research work and communicate with growers the benefits of changing production practices.

We need the services of a Pistachio Researcher to continue past and current work and who can determine and advise growers to achieve this vision.

Located in Sunraysia, this position would suit an Agricultural Science graduate with at least 4-5 years experience working with tree crops. Field trials; research and strong observational skills; excellent communication skills and data modelling will be required. Passion for an expanding Australian pistachio industry will be expected. Participation in international pistachio research is expected.

You would need to be an independent worker and self-starter, keen to lead the expanding Australian pistachio industry.
