

Video: Aphids - training

Action:
Looking at plant then close-up grief

Dialogue
Hey what's going on here? / Ahh! Aphids!

FX:

Action:
3 shots (stills)

Dialogue Aphids are soft-bodied insects that suck juices out of many plants. These aphids are on a rose bush. While feeding, aphids exude a sweet, sticky substance called honeydew. Here is one EZ control method.

FX:
Pan / Zoom

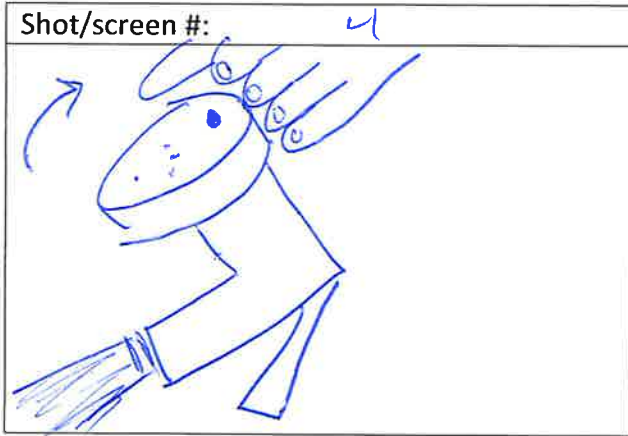

Action:
Attaching nozzle + turning on spigot

Dialogue
All you need is a garden hose w/ a spray nozzle. Attach the nozzle to the hose and turn on the water.

Dialogue
— is very happy the aphids are gone and she didn't need to use any pesticides.

Dialogue
This technique isn't always appropriate or effective, but you can find more ways to control aphids in your yard at the ucipm program website.

Dialogue
The uc ipm website has lots of research-based information about controlling pests at home.

FX: would like sparkle + ding with smile.
