Monthly inspection includes:

Eyewash

- Ensure clear access with no obstructions.
- Verify that bowl and spouts are clean and free of trash.
- Place dishpan or bucket under drainpipe to collect the water.
- Press handle to activate eyewash.
- Verify that flow is continuous from both eyepieces.
- Evaluate adequate flow - streams of water should cross.
- Flow should continue until handle is returned to "off" position.

Shower

- Ensure clear access with no obstructions.
- Place bucket or large trash can under spout to collect the water.
- Pull handle to activate shower.
- Verify flow from shower.
- Return handle to "off" position.
