## WORKING SAFELY WITH HORSES

U.S. Consumer Product Safety Commission data indicate that in 2005 more than 400 youth aged 18 years and younger were treated in hospitals for injuries received while grooming, walking, bridling, or saddling horses. Most injuries occurred when handlers were either kicked or stepped on by horses. For additional information about working safely with horses, go to the Clover Safe note at: <http://ucanr.org/cloversafe>.

Clover Safe Notes are prepared by the UC ANR Office of Environmental Health & Safety, in support of the Statewide 4-H Youth Development Program.
