## **PORTABLE POWER DRILL SAFETY**

Information available from the U.S. Consumer Product Safety Commission indicates more than 2,500 people were treated in hospitals for portable power drill injuries during 2005. Typical injuries were cuts and punctures to fingers and hands. For additional information about portable power drill safety, go to the Clover Safe note at: <http://ucanr.org/cloversafe>.

Clover Safe Notes are prepared by the UC ANR Office of Environmental Health & Safety, in support of the Statewide 4-H Youth Development Program.
