

COVID-19 Stage 2 Readiness Snapshot

What's involved in moving to Stage 2?

1. County is ready for Stage 2
2. Do you need to work in person?
3. Location Safety Plan
4. Five basic rules for being onsite

Check these steps to stay safe and healthy as we move to Stage 2

1. The State's requirements for a County to move to Stage 2 are:

Epidemiologic Stability	Testing capacity
<ul style="list-style-type: none"> No more than 1 case per 10,000 people in the last 14 days No COVID-19 deaths in the past 14 days 	<ul style="list-style-type: none"> Minimum daily testing of 1.5 per 1,000 residents
Protection of Stage 1 Essential Workers	Containment Capacity
<ul style="list-style-type: none"> Ability to support employees when sick or exposed Availability of disinfectant supplies and protective gear 	<ul style="list-style-type: none"> At least 15 contact tracers per 100,000 residents Ability to temporarily house at least 15% of county residents experiencing homelessness

2. Do you need to work in-person (at an office, field site, etc.)?

If employees can work effectively from home (and were not part of the Stage 1 group who continued essential activities outside the home), then they should continue to work at home at this time. If your work cannot be performed from home or the operational needs of your department require in-person work, then a Location Safety Plan must be prepared to assure that the workplace is ready for increased in-person activity.

3. Location safety plan

The [UC ANR Location Safety Plan for Resuming In-Person Activity, Stage 2](#) documents that a location has taken the necessary steps to plan and prepare for the resumption of in-person activities. The location supervisor needs to prepare a Location Safety Plan and submit it to [Brian Oatman](#) for review and approval by ANR's Emergency Response Team (ERT). The Location Safety Plan will include a roster of the employees who will be returning to in-person work.

4. Five basic rules for being onsite

In resuming in-person work outside the home, at a minimum, people must abide by these five basic mitigation protocols (even when County requirements are less restrictive):

1. Do not come to work or participate in any in-person ANR activities if sick (frequent cough, fever, difficulty breathing, chills, muscle pain, headache, sore throat, recent loss of taste or smell) or if you or someone you have been in contact with has been diagnosed with COVID-19.
2. Maintain six feet of distance between people at all times.
3. Wear face coverings (cloth or paper masks, cloth bandannas, etc.) when six feet of separation between people cannot be maintained.
4. No group meetings/gatherings/events with more than 10 persons.
5. Maintain sanitary practices – frequently clean and disinfect workspaces and equipment, wash hands often, and use hand sanitizer.

Your Location Safety Plan will include more detail about these basic protocols and how they are implemented at your worksite. These safety standards are specifically intended for Stage 2 of California's reopening. They may be modified at any time by UC ANR or other authority of the University of California.
