Each year, an average of more than 200,000 people are hospitalized and 36,000 people die from seasonal influenza (flu) complications in the United States. You can help keep yourself, your family, and your fellow 4-H volunteers and members healthy and prevent the spread of seasonal colds, flu, and other communicable diseases by practicing some simple measures at home, work, school, and other social settings. In fall of 2009, there is particular concern over the novel H1N1 influenza virus (also known as swine flu). The precautions to protect yourself from H1N1 are the same as those recommended for seasonal flu or other common communicable illnesses.

For additional information about preventing the spread of communicable diseases, go to the Clover Safe note at: [http://ucanr.org/cloversafe](http://ucanr.org/cloversafe).

Clover Safe Notes are prepared by the UC ANR Office of Environmental Health & Safety, in support of the Statewide 4-H Youth Development Program.
