When new employees start working onsite (or an existing employee returns to the office) there are several steps related to COVID-19 to complete before they arrive or soon after.

**Employee Needs to Disclose their Vaccination Status**

In compliance with the UC COVID-19 Vaccination Program Policy, all employees need to report their vaccination status. This information is used to verify compliance with policy, to determine if additional COVID-19 safety protocols are required, and may be needed to determine the appropriate response if there is a COVID-19 case in the workplace. Each employee’s vaccination status is kept confidential and only a very few staff in Human Resources and Risk & Safety Services can access this information.

Employees with a UC ANR Portal login credential can respond to the UC ANR COVID-19 Vaccine Status Disclosure survey to provide their vaccination status and upload their vaccination record here: https://ucanr.edu/portal/covid_vaccination_status_disclosure.cfm

If an employee cannot access the survey or upload the vaccination record at the link above, they may also use the following link to securely upload their vaccination record: https://ucdavis.app.box.com/f/933b2cf8007d45bd9598644c02a86084

For more information about the COVID-19 vaccination policy, see: https://safety.ucanr.edu/Programs/emergency/Current_Highlight_Alerts/COVID19Vaccines/

**Flu Vaccination Executive Order**

To comply with UC’s Flu Vaccination Executive Order, all employees must validate their vaccination status by responding to the UC ANR Influenza Vaccine Status Survey and attesting that they have been either vaccinated against influenza, or opt out using the UC ANR Declination Form located in the survey.

For questions about the flu vaccination mandate, please review the FAQs and/or contact ANR Human Resources (humanresources@ucanr.edu)

**Employees must self-monitor and report COVID-19 symptoms, exposures and testing**

All employees who are working at a UC ANR office, in the field, or at partner sites must monitor themselves for COVID-19 symptoms before coming to work each day. Symptoms include: Fever or chills, Cough, Shortness of breath or difficulty breathing, Fatigue, Muscle or body aches, Headache, New loss of taste or smell, Sore throat, Congestion or runny nose, Nausea or vomiting, and/or Diarrhea. See CDC symptoms for more information. Employees must also report close exposures to someone who has COVID-19, and must report positive COVID-19 test results.
The COVID-19 Screening Report survey is the mechanism to report test results, symptoms, or exposures and employees are expected to follow the specific guidance provided by the survey, based on their report. For more information or to complete the COVID-19 Screening Report, go to: [http://ucanr.edu/covid19screening](http://ucanr.edu/covid19screening)

**Training**

New employees or those returning to onsite work must complete the [UC Online COVID-19 Prevention Training](http://ucanr.edu/covid19):
- click on “Training Materials”
- enter name, email, and under “University or Institution” enter UC ANR
- Go through the training and complete the test. On the test, select “Agriculture & Natural Resources” for your campus or location, so we have a record of your completion

**Location COVID-19 Prevention Plan**

Provide new or returning employees with a copy of your location’s COVID Prevention Plan (CPP), and any site-specific procedures. Each UC ANR location has a customized CPP, based on this UC ANR template: [https://ucanr.edu/sites/safety/files/368256.pdf](https://ucanr.edu/sites/safety/files/368256.pdf)

Remind or inform the employee of UC ANR’s [Mask Protocol](http://ucanr.edu/covid19) and procedures for [Reporting a COVID-19 Positive Test or Exposure](http://ucanr.edu/covid19).
Additionally, review any local or site-specific procedures or reporting requirements.

For more information about UC ANR COVID-19 Safety Protocols, see: [http://ucanr.edu/covid19](http://ucanr.edu/covid19)
