## Apple or Pomegranate Juice

Quality: Good quality apple juice is made from a blend of varieties. For best results, buy fresh juice from a local cider maker within 24 hours after it has been pressed.

Please read Using Boiling Water Canners before beginning. If this is your first time canning, it is recommended that you read Principles of Home Canning.

Procedure: Refrigerate juice for 24 to 48 hours. Without mixing, carefully pour off clear liquid and discard sediment. Strain clear liquid through a paper coffee filter or double layers of damp cheesecloth.

Heat quickly, stirring occasionally, until juice begins to boil. Fill immediately into clean pint or quart jars, leaving $1 / 4$-inch headspace. For information about preparing jars see "Sterilization of Empty Jars". Adjust lids and process according to the recommendations in Table 1.
