

California Fertilization Guidelines

Daniel Geisseler

Department of Land, Air and Water Resources, UC Davis

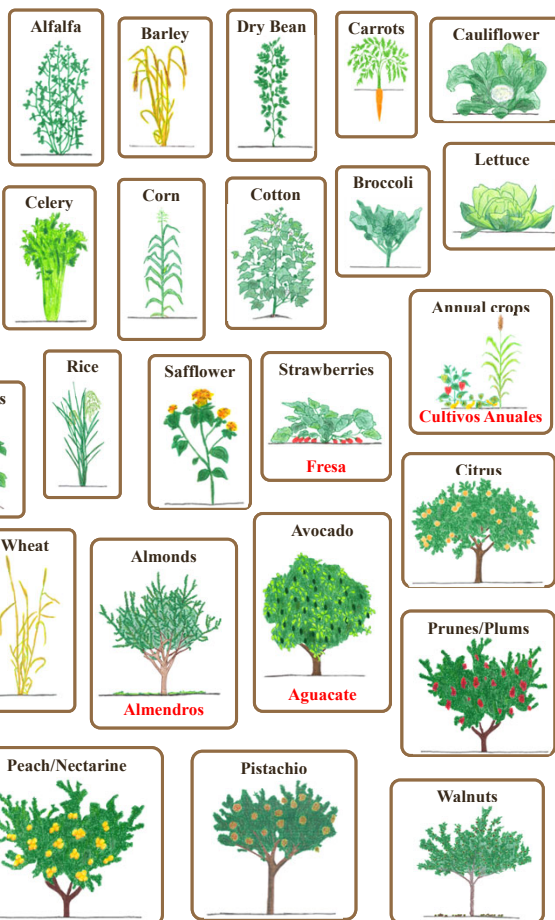

Background

In collaboration with CDFA-FREP we have synthesized peer reviewed journal articles and research reports. The resulting fertilization guidelines are available online in a user-friendly interface.

The guidelines include information on:

- Fertilization (rate, time, placement, and material)
- Deficiency symptoms
- Soil testing
- Plant tissue analyses
- N uptake and removal rates
- N uptake curves
- Site-specific adjustments

Crops Currently Available

Optimized layout for different screen sizes and devices

Acknowledgments

Funding:

- California Department of Food and Agriculture – Fertilizer Research and Education Program (CDFA-FREP)

Content contributors:

- Patricia Lazicki
 - William Horwath
