

# 8th California Oak Symposium

## Sustaining Oak Woodlands Under Current and Future Conditions

PLANNING COMMITTEE: Royce Larsen, Devii Rao, Matthew Shapero, Bill Tietje (UCCE); Claudia Tyler (UCSB); Jessica Wright (USFS)

### Ongoing Relevance

California Oak Symposia bring us up-to-date on the status of oak research and outreach; facilitate collaboration among scientists, policy makers, and stakeholders; and provide a path forward. What is learned is preserved in a USFS published proceedings. The 8th Oak Symposium *Sustaining Oak Woodlands Under Current and Future Conditions* was held last November in San Luis Obispo.

### Attendee Comments

243 registrants from CA, AK, WA, MI, IL & Spain

“Have more frequent symposia! Too much information passes by that needs presenting.”

“An enjoyable and educational few days. I look forward to the next one.”

“Thank you, I had an absolute blast and I look forward to attending far into the future.”

### Field Tours

Learning Among the Oaks

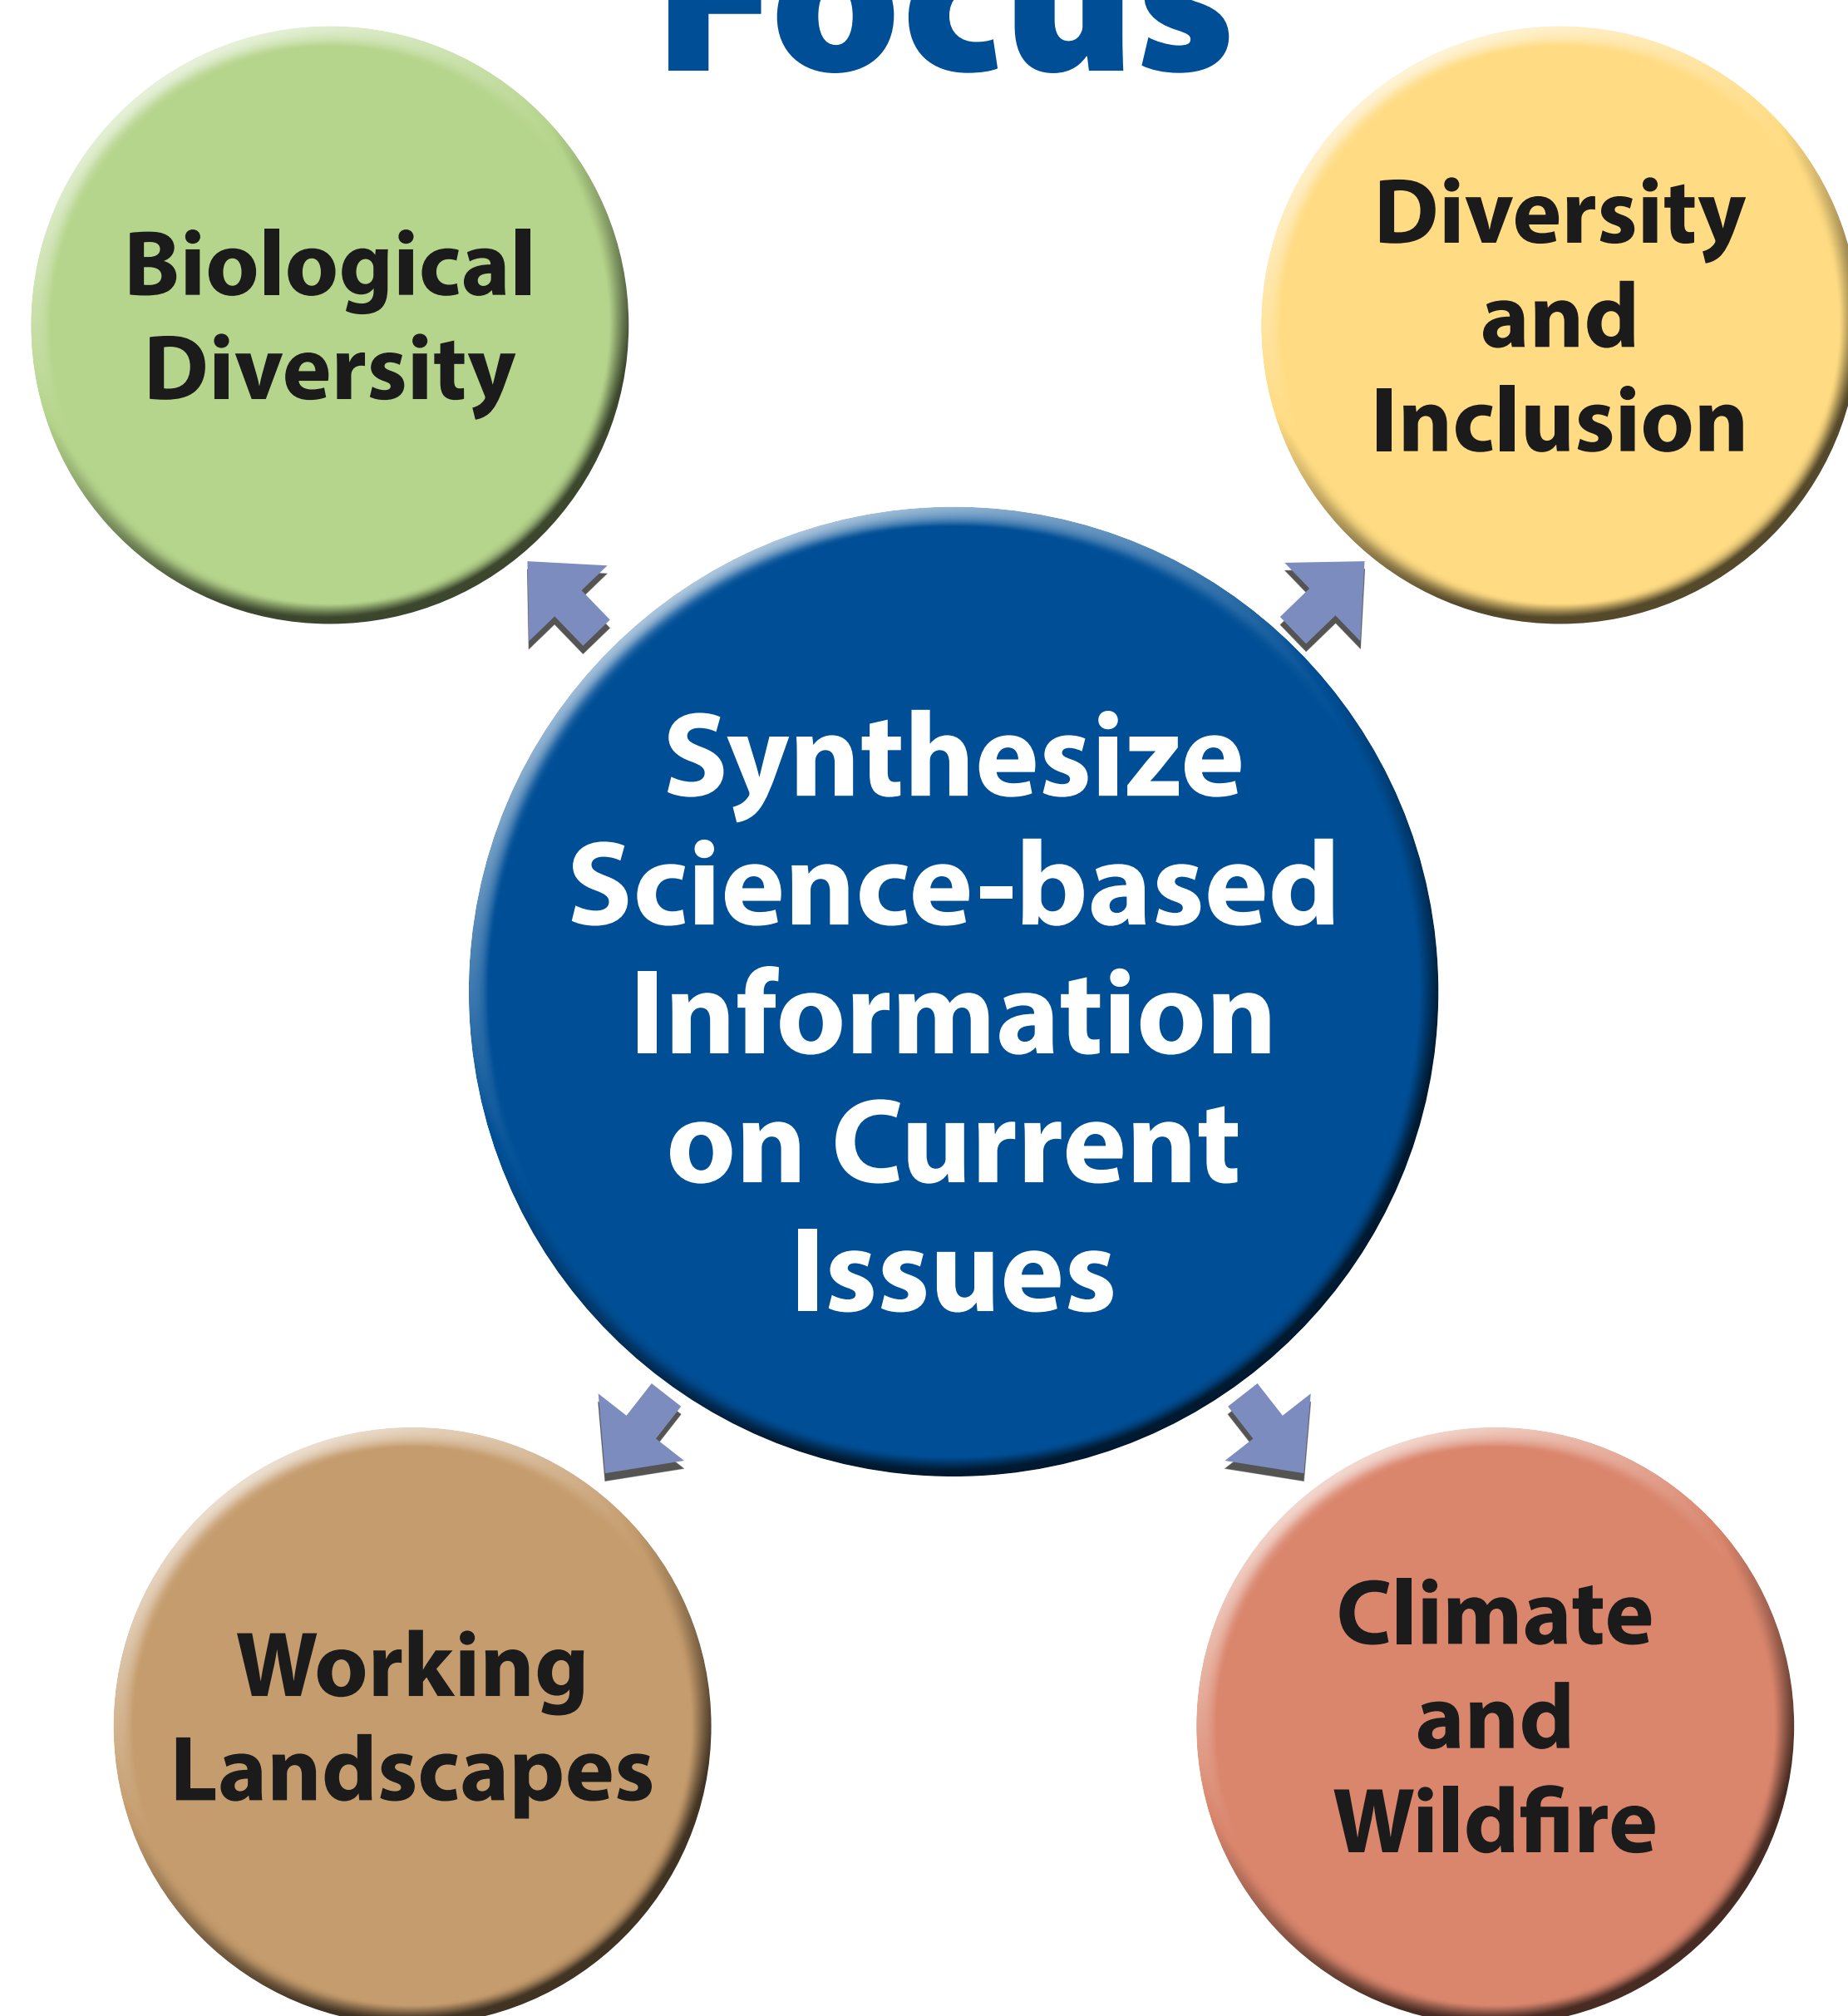

Sinton Family Ranch

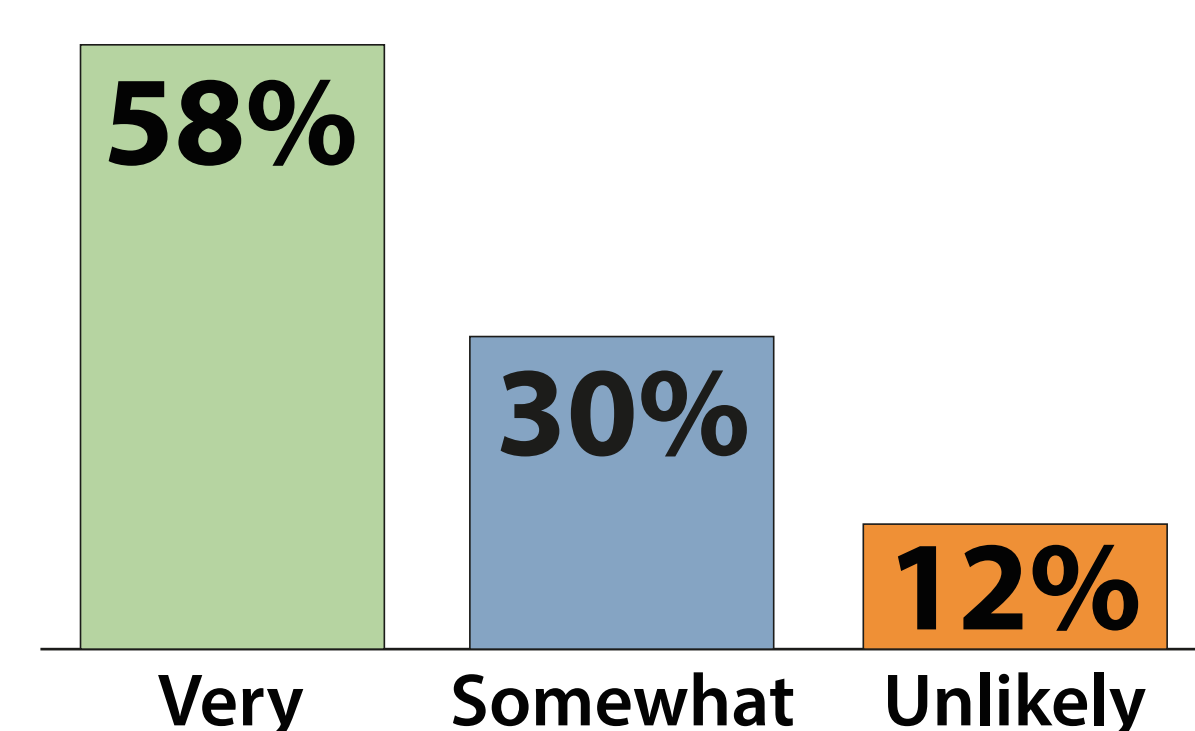

Dangermond Preserve

### Symposium Focus

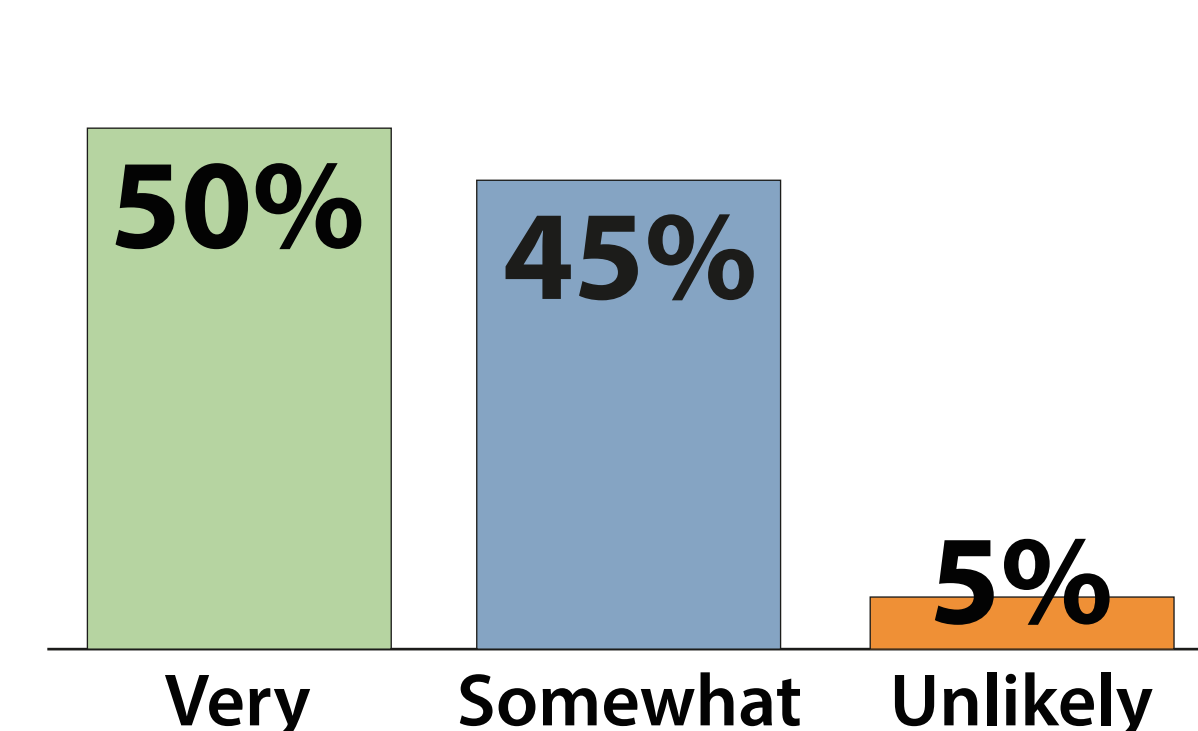

### Impacts

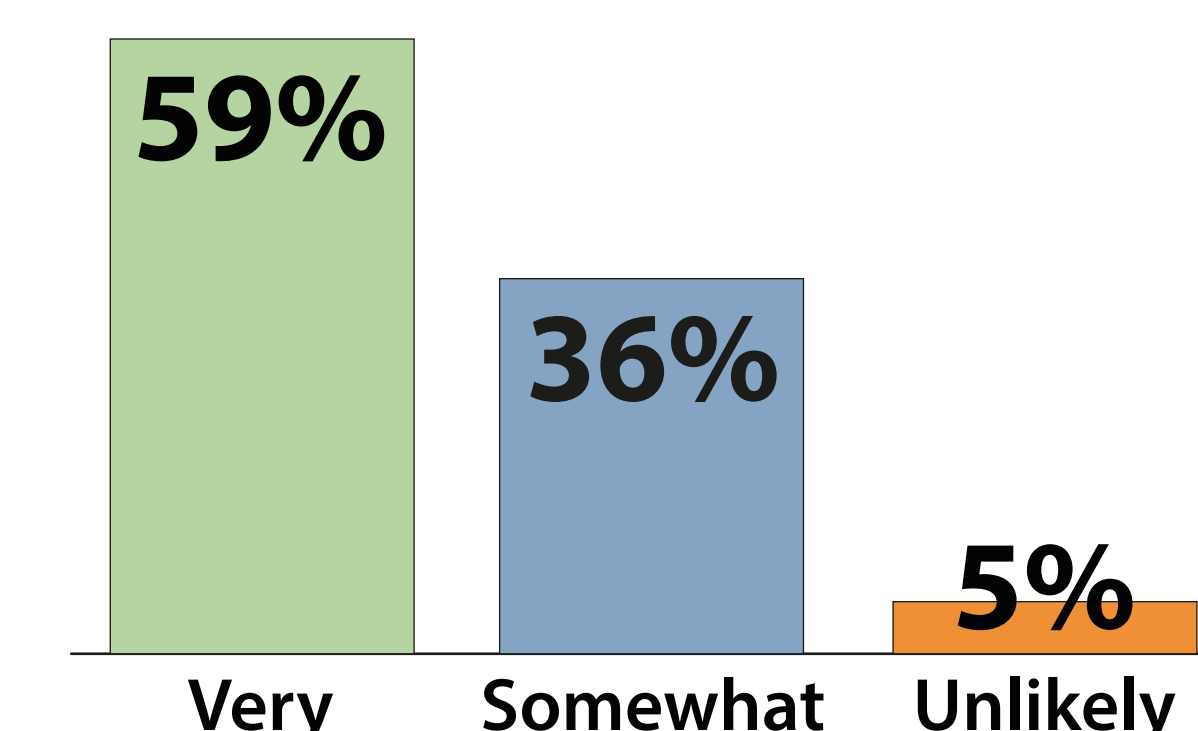

How useful was the information for your Cooperative Extension role?

How much will the 8th Oak Symposium help to improve your research, teaching, or land management?

How likely are you to encourage a colleague to attend the 9th Oak Symposium?

### The 9th Oak Symposium

*Let's get together and continue to learn more—again!*

Maintaining a healthy relationship between working landscapes and oak woodlands is vital. Doing so will protect our oak landscapes for their economic values and ecosystem services—including habitat, biodiversity, carbon sequestration, and viewsheds.
