The sustainability and competitiveness of the $3.6 Billion California citrus industry depends on the availability of pathogen-tested propagative materials. For over 65 years, the Citrus Clonal Protection Program (CCPP) is providing services for therapy, pathogen detection, and budwood distribution while with the support of its university, government and industry partners the CCPP is investing in research and innovation. The most recent CCPP upgrades include:

(1) Personnel
(2) Facilities
(3) Indoor citrus cultivation
(4) Diagnostics
(5) Budwood distribution
(6) High throughput testing
