

CE's to Public Hands-on Classes

UCCE Master Food Preservers of Sacramento County

Hands-on

Sacramento County has created CE opportunities that are then turned around and taught to the community as hands-on and demonstration classes. In this way, we practice new skills rather than just read about them, helping us feel empowered to reach out and share our new knowledge. The resulting classes have provided a significant impact on our community.

Training

Master Food Preservers require 12 hours a year of continuing education. These hours may be earned in many ways.

For the Community

Master Food Preservers of Sacramento County have held 15 hands-on CE classes since fall of 2021. Over 380 hours of MFP CE hours have been earned on topics which have reached 712 people in the greater Sacramento community.
