

2024 Practical Training of Nitrogen Management in Organic Production of Annual Crops

Nov 18-Dec 9, Mondays from 1-3 pm

About this workshop:

In this 4-part series, participants will learn how to estimate nitrogen release from diverse organic sources and translate that knowledge to nitrogen fertilization plans and regulatory reporting requirements.

Who should enroll?

Growers, CCAs, PCAs and other agricultural professionals who are interested in learning about nitrogen management in organic production are encouraged to enroll.

- Cost: \$30
- Limited to only 80 attendees. Register soon!
- Virtual Event
- Habrá traducción al Español - Live Spanish Translation will be provided!
(No one will be turned away due to lack of funds. Please email us to inquire)
- **Earn 8 hours of CDFA-INMTP continuing education credits** (formerly CURES CE Credits)
- **Earn 8 hours CCA credits**
