

4-H Embryology

Be sure to use the 4 H's during your project!

Head

Learn all you can about what happens with your eggs as the chicks grow.

Heart

Care for your eggs. You and the equipment are doing the job the hen would do.

Hands

Touch your eggs carefully and only when necessary.

Health

Before and after handling the eggs, wash your hands! Human bacteria may be ok for humans, but not for chicks! Chick bacteria is also not good for humans.
