

Q: How can I find out about new UC Cooperative Extension publications and research?

A: You can always call our office to see what we have in the way of new publications and research information for your needs. Also, you can find new publications by visiting one or more of our websites. Perhaps the most complete listing of available publications is our Division's Agriculture and Natural Resources (ANR) Communication Services website, <http://anrcatalog.ucdavis.edu>. You can select 'New Additions' on the left menu bar to find our newest publications. Many are available at no cost if you download and print them yourself. Others have a cost associated with them. Many of the items can be obtained at our office. Recent additions that might be of interest include:

Songbird, Bat and Owl Boxes. This guide explores the integration of nesting boxes with vineyard management, but could be useful to others interested in the topic. Publication 21636. Cost: \$15.

Maintaining Microirrigation Systems. The publication discusses maintenance of systems that can be used on tree, vine, and row crops. Publication 21637. Cost: \$20.

Integrated Pest Management (IPM) in Schools. This interactive 2-Disc DVD program was created for school personnel and others involved in managing pests in schools. It might also be of interest to those seeking less toxic strategies for public and private buildings. Publication 6589D. Cost: \$35.

Caneberries: UC IPM Pest Management Guidelines. Publication 3437. Cost: \$5 (hard copy) or \$0 (downloadable).

Farm Water Quality Plan. Publication 8332 (replaces 9002). Cost: \$0 (downloadable).

Flower Flies (Syrphidae) and Other Biological Control Agents for Aphids in Vegetable Crops. Publication 8285. Cost: \$0 (downloadable).

Landscaping Tips to Help Defend Your Home from Wildfire. Publication 8322. Cost: \$0 (downloadable).

Living Among the Fish: A Guide to Conservation of Fish Habitat. Publication 8279. Cost: \$0 (downloadable).

Walnut: UC IPM Pest Management Guidelines. Publication 3471. Cost: \$5 (hard copy) or \$0 (downloadable).

Another resource is the University of California's publication *California Agriculture*. *California Agriculture* is a peer-reviewed journal reporting research, reviews, and news from our Division. The website is: <http://californiaagriculture.ucop.edu/>. The most recent edition has articles on Light Brown Apple Moth, Methyl Bromide Alternatives, and Food Safety and Environmental Quality.
