

## STRATEGIES TO REDUCE IN-PERSON MEETING SIZE

to 8 members or less

### DIVIDE GROUP BY EXPERIENCE

Beginner, Intermediate and Advanced

### DIVIDE GROUP BASED ON OTHER FACTORS

Example: Groups meet on different days/times.

### SPLIT GROUP INTO 6 WEEK SESSION COHORTS

One cohort meets for 6 weeks, second cohort meets over the next 6 weeks.

### DIVIDE GROUP BASED ON NEEDS

Example: access to internet

### CAP ENROLLMENT IN PROJECTS

For popular projects, offer multiple sessions

**Divide project participants based on experience** (beginner, intermediate, advanced). *Example:*

- Hold monthly virtual meetings with all members on a common topic
- Alternate meeting in-person with a subset of the group based on experience. The in-person meeting can focus on beginner, intermediate, or advanced level activities in the project.

**Divide group based on other factors** (subgroups meet on different days/times). *Example:*

- Break group up into 3 smaller groups. Each group meets for 60 minutes in-person on a Saturday afternoon. Schedule ample time between meetings to sanitize surfaces and materials and limit contact between groups.

**Divide group into cohorts that meet together in separate 6-week sessions.** *Example:*

- One cohort meets in-person on the second Monday.
- Second cohort meets in-person on the fourth Tuesday.

**Divide group based on needs.** *Example:*

- Meet in-person with youth who have limited access to internet.
- Connect with rest of youth virtually during the meeting.

**Offer multiple sessions for popular projects.** *Example:*

- Recruit multiple adult project leaders and ask each pair to take a session.

As a last resort, consider capping youth enrollment in projects, following 4-H policies about [limiting participation](#).
