

About Master Gardeners

Our mission as University of California Master Gardener volunteers is to extend research-based sustainable gardening and composting information to the public through various educational outreach methods. We strive to present accurate, impartial information to local gardeners so they have the knowledge to make informed gardening decisions in regard to plant choices, soil fertility, pest management, irrigation practices, and more.

The Master Gardener volunteer program was started in the early 1970s at Washington State University. Farm Advisors became overwhelmed by all the incoming calls from home gardeners and homesteaders so they trained volunteers to answer these questions and the “Master Gardener Program” was born. The first University of California Master Gardener programs began in 1980 in Sacramento and Riverside counties. The Nevada County and Placer County Master Gardener Programs began soon thereafter in 1983.

Cooperative Extension was established in Placer and Nevada Counties in 1917. Our mission is to help all segments of the community benefit from the scientific advances in our nation's land-grant universities, particularly in the areas of agriculture, family and consumer sciences, and youth development. The Master Gardener Program operates under the umbrella of the UCCE.

How to Become a Master Gardener

The UC Master Gardeners of Placer and Nevada Counties train during **even numbered years**, normally January through May. During the previous fall, we will schedule an informational meeting about becoming a Master Gardener. If you are interested in volunteering your time to help others learn about gardening, please go to the link below to sign up on the interest list. We will notify you when the next informational meeting is scheduled. Thank you for your interest.
