

Developing decision support tools for processing tomato irrigation and fertilization

Daniel Geisseler

Nutrient Management Specialist, UC Davis

**Northern San Joaquin Valley Processing
Tomato Meeting, Modesto
January 31, 2019**

Objectives

Develop tools for irrigation and N fertilization for subsurface drip irrigated processing tomatoes

- Monitor canopy development and N uptake in commercial fields
- Determine total N uptake and partitioning in these fields
- Develop irrigation and N fertilization tools

Acknowledgement

- CDFA Fertilizer Research and Education Program (FREP)
- California Tomato Research Institute
- UC ANR California Institute for Water Resources
- Growers
- Gene Miyao, Brenna Aegerter, Tom Turini, Michael Cahn, Tim Hartz
- Israel Herrera and the Russell Ranch field

Finding the tools

CropManage for processing tomatoes:
