

## What boaters can do to stem the spread of invasive quagga/zebra mussels

- Be aware that transferring a boat that has been in infested waters will allow the spread of quagga mussels, or the closely related zebra mussels.
- Thoroughly wash the hull of each fishing boat, sailboat, or personal watercraft once it leaves the water. This is especially important if the vessel has been moored for more than a day.
- Use hot water from a high-pressure hose when possible during all cleaning operations.
- Thoroughly wash any watercraft trailer used to remove a boat from a lake, river or waterway. Use hot water from a high-pressure hose when possible.
- Physically inspect all exposed surfaces. The presence of quagga mussels will feel like sandpaper to the touch.
- Remove aquatic plants from boat, motor and trailer. Check all underwater fittings and equipment, such as rollers, axle, bilge and trailer, and above water equipment, such as anchors, live wells, and docks. Place aquatic plants in trash if possible.
- Drain any lake or river water from equipment including the motor, bilges, live wells, bait buckets, and coolers. Ensure all drained areas are dry.
- Ensure the watercraft's lower outboard unit is drained and dry.
- Dispose of unwanted live bait on shore or in trash.
- Any vessel traveling from Lake Mead, Lake Mohave, Lake Havasu, the Colorado River, or lakes that receive water from the Colorado Aqueduct, including: Lake Skinner (Riverside County), Lake Mathews (Riverside County), San Vicente Reservoir (San Diego County), Dixon Lake (San Diego County), Lower Otay Reservoir (San Diego County), Miramar Reservoir (San Diego County) and Lake Murray (San Diego County) should remain dry and out of water for a minimum of five days or longer depending upon the weather.
- For personal watercraft, impeller areas can contain quagga and zebra mussels and aquatic plants. Once upon the trailer, run the engine for five to 10 seconds to blow out excess water, mussels and plants. Before leaving water access, inspect and remove any mussels or plants from intake, steering nozzle, hull, and trailer.
- Exercise patience at Department of Fish and Game vehicle checkpoints and Department of Food and Agriculture border inspection stations.
